

Yuanchao Xu

xu.yuanchao.3a@kyoto-u.ac.jp

Room 4-405, Maskawa Building for Education and Research, Kyoto University

August 7, 2026

Working Experience

University of Alberta

Visiting Postdoc, Applied Mathematics
April 2026 - August 2026

Kyoto University

Postdoc, SACRA
September 2025 - August 2030

Education Experience

University of Alberta

Doctor of Philosophy (*Dissertation Award*), Applied Mathematics
September 2021 - August 2025

University of Manitoba

Master of Science, Mathematics
September 2018 - August 2020

University of Oregon

Bachelor of Science (*Cum Laude*), Mathematics
January 2015 - December 2017

Research Interest

My research interest lies in data-driven methods for stochastic dynamical system. In particular, I am interested in building up theoretical framework for learning stochastic Koopman operator and applying it into complex real-world problems, e.g., computational neuroscience, reinforcement learning and generative modeling, etc.

Research

1. Galerkin Approximation and Finite-Data Error Analysis for Stochastic Dynamic Mode Decomposition of Itô Diffusions (Submitted) (2026) (*Single author*)
2. Dictionary-Induced Boundary Realizations and Noncommuting Limits in Koopman Generator Approximation (Submitted) (2026) (*Single author*)
3. Logarithmic Suspension Response for Lorenz-Type Models with a Moving Singular Stable Leaf (Submitted) (2026) (*Single author*)
4. A Variational Galerkin Framework for Spectral Learning and Forecasting with Backward-Operator Estimators (In preparation, 2025) (*1st author*)
5. Generative Modeling through Koopman Spectral Analysis: An Operator-Theoretic Perspective (arXiv, 2025) (*1st author*)
6. Reinforcement-learning-guided data-driven estimation of spectral properties of stochastic Koopman semigroups (DCDS-I, 2025) (*1st author*)
7. Spectral analysis of Koopman operator through pseudo-resolvent (Submitted) (arXiv, 2025) (*1st author*)
8. A Data-Driven Framework for Koopman Semigroup Estimation in Stochastic Dynamical Systems (Chaos, 2025) (*1st author*)
9. Koopman Eigenfunctions Links Multiscale State-Dependent Brain Dynamics (In preparation, 2025)
10. ResKoopNet: Learning Koopman Representations for Complex Dynamics with Spectral Residuals (ICML2025, Vancouver, Canada, 2025) (*1st author*)
11. Koopman Spectral Analysis Uncovers the Temporal Structure of Spontaneous Neural Events (COSYNE (poster), Lisbon, Portugal, 2024)
12. Decentralized Multi-Agent Reinforcement Learning for Task Offloading Under Uncertainty (arXiv, 2021) (*1st author*)
